**New Furniture
Collection From
Dutch East Design
x Jamie Stern
Design**

The minds behind the celebrated New York City-based multidisciplinary design firm, Dutch East Design paired with Jamie Stern Furniture, Carpet & Leather to create the FLOAT Collection.

PRODUCTS

The collaborative collection consists of soft, rounded chairs and barstools supported on understated legs designed to express the negative space between the furniture

and the ground. Each of the elevated styles can be upholstered in Jamie Stern leather or the customer's own material for an aesthetic that pairs with both modern and

contemporary design schemes. The welded steel frames come in muted tones of painted steel available in black, white, and brass. Perfect for lobbies, lounges, and hotel f&b

settings, the FLOAT Collection delivers the best in form and function.
